Hello,

I am Shakshi Gandhi - a curious, detail-driven data professional with hands-on experience at ZS, Oracle, and Colgate. I have worked across analytics, data science, consulting, and business insights, and what's always excited me most is figuring out the *why* behind the numbers.

Across projects, I've found joy not just in building solutions, but in understanding why something didn't work the first time. Whether it was optimizing \$650MM in budget forecasts at ZS or rebuilding processes at Oracle, I have learned that real impact often comes from digging into the messy middle - asking questions, brainstorming, and not being afraid to start over if needed.

Now, as a graduate student at the University of Washington, I'm looking to contribute to a team that values thoughtful problem-solving and uses data to tell clear, meaningful stories. I would love to explore how I could bring that mindset to your team.

If there's a spot on your team, I would really appreciate the chance to share how I might be helpful. I hope we have the opportunity to connect soon!

Thanks for reading,  
Shakshi Gandhi
